We provide individual care following an amputation.

This includes both pre- and post-prosthetic training. Therapy plays an important role in returning patients to their prior level of function.

KEY COMPONENTS OF OUR PROGRAM:

Address limb management, including learning positioning techniques to avoid tightening of tissues/contractures, compression to control swelling, desensitization and skin care.

- Discuss patient's goals.
- Work to improve strength, flexibility, mobility, coordination and endurance to prepare for and utilize a prosthetic.
- Help with standing, balancing and walking including navigation of stairs, ramps, curbs and grass/outdoors.
- Work closely with the prosthetist to ensure coordinated care.
- Guide rehabilitation to help patients regain movement and function safely.

REFER A PATIENT

Choose one of these three convenient ways:

- Submit an internal referral through Epic.
- Call us with the referral at (866) 402-2753 or (217) 383-4040.
- Fax a prescription to (217) 383-6176.

INSURANCE

Patients should contact their insurance provider to determine coverage before making an appointment.
